PROFILE

Software Engineering fresh graduate from The British University in Egypt / London South Bank University, graduating with Distinction (Honors) and a GPA of 3.7. Based in New Cairo, Egypt. Military status: Exempted. Experienced in back-end development, full-stack web projects, AI-powered mobile applications, RAG-based systems, and AI-supported educational tools using Java, Spring Boot, Flutter, Firebase, Node.js, MongoDB, Qdrant, and LangChain.js.

EDUCATION

The British University in Egypt / London South Bank University
Dual Bachelor's Degree in Information and Computer Science (Software Engineering) | GPA: 3.7

Cairo, Egypt
2022 - 2026

Al Farouk Islamic Language School
Egyptian Diploma

Cairo, Egypt
2009 - 2022

INTERNSHIPS

Software Engineer Intern - Celfocus
Hybrid

Cairo, Egypt
July 2026 - Aug 2026

- Rotated across front-end, back-end, QA/system testing, Agentic AI, and DevOps on live company projects, gaining hands-on exposure to the full software delivery lifecycle.
- Built and tested features using Spring and React, strengthening full-stack development, testing, and deployment skills.
- Learned to build and use Model Context Protocol (MCP) servers, apply prompt engineering techniques, and develop agentic AI workflows.

Back-End Developer Intern - Connect Digital Solutions (CDS)
Hybrid

Cairo, Egypt
July 2025 - Sep 2025

- Gained practical back-end development experience with Java, OOP, data structures, Spring Boot, Spring Data JPA, Spring Security, and microservices.

CIB Online Internship
Cybersecurity and workplace readiness training

Cairo, Egypt
July 2024 - Aug 2024

- Completed cybersecurity training covering common cyber threats, protection strategies, and digital awareness.
- Earned certificates in Emerging Talent for the Future Workplace (CIB), Human-Centric Interpersonal Skills (Frankfurt School), Financial Literacy and Entrepreneurial Skills (LinkedIn), and Digital Transformation and Data Literacy (SAS).

E-commerce Intern - Mazaya Group
Member of the Marketing Committee | On-site

Cairo, Egypt
Aug 2023 - Sep 2023

- Supported website-related and marketing activities while building practical experience in Excel, Word, data entry, and data analysis.

COURSES

Web Development using React.js (120 hrs.) - Information Technology Institute (ITI)

Online
Aug 2025

- Covered client-side technologies, ES.Next, HTML5, Bootstrap, and React.js.

Introduction to Programming in Python - Harvard CS50

Online
June 2023 - July 2023

- Covered programming fundamentals, problem solving, OOP, data structures, and file handling.

PROJECTS

Digital Diet and Fitness Assistant (Flutter, Node.js, Firebase, Qdrant, LangChain.js)

Graduation Project - BUE

- Developed an AI-powered mobile application using Flutter and Node.js, based on a RAG architecture with Firebase authentication, a Qdrant vector database, LangChain.js orchestration, and LLM-based personalized diet and workout generation.

Agentic AI (Python, Tkinter, OpenCV, MediaPipe, FAISS)

Senior Year - BUE

- Implemented a multi-agent adaptive Python quiz system using Orchestrator, Perception, Adaptation, Hint, and Quiz Interface agents; integrated webcam gaze/emotion detection, FAISS hint retrieval, TinyLlama explanations, adaptive repetition, and Excel logging.

Hotel Management System (Java, MongoDB)

Senior Year - BUE

- Developed an object-oriented software project using Java and MongoDB, based on a client-server architecture with remote objects.

Mobile Application (Flutter, Firebase)

Senior Year - BUE

- Built a mobile application using Cloud Firestore and Firebase Authentication.

Full Stack Website (Tailwind CSS, Node.js, React, MongoDB)

Third Year - BUE

- Built a MERN-stack website styled with Tailwind CSS, applying RESTful APIs, asynchronous programming, database modeling with Mongoose, and front-end/back-end integration.

Park Management System (Java, PHP)

Third Year - BUE

- Designed a desktop application using Java GUI and a PHP-based backend for data management; applied MVC and design patterns to strengthen software architecture understanding.

AI Algorithms - Tic-Tac-Toe Game

Third Year - BUE

- Applied algorithmic thinking, recursion, and AI decision-making strategies.

SKILLS

- **Programming Languages:** C, C++, C#, Python, Java, SQL, Dart, HTML, CSS, JavaScript
- **Frameworks and Technologies:** Flutter, Firebase, Node.js, React.js, Tailwind CSS, MongoDB, Spring Boot, Spring Data JPA, Spring Security, Microservices, Qdrant, LangChain.js, OpenCV, MediaPipe, FAISS, Git, Docker
- **Software Engineering:** OOP, data structures, algorithms, design patterns, database design, RESTful APIs, mobile development, web development, game development, Multithreading, Software Quality Assurance, DevOps, Testing
- **AI:** CNNs, NLP, Model Training, RAG, Prompt Engineering, MCPs
- **Tools:** Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Adobe Photoshop, VS Code, IntelliJ
- **Languages:** Arabic (native), English (fluent)
